

### **Definition of Done**

1. We can view player data and visualize it with graphs on the website.
2. All visualizations are what we expect to see
3. Player data is correctly displayed
4. No compiling errors
5. Code is well-documented and self-explanatory
6. UI is clear and interactive

### **Acceptance Criteria**

1. If the feature works on every machine.
2. If code is merged with dev without conflict.
3. Fulfills each task in the user story.
